

ASCENT SOLUTIONS

Breakfast Seminar
July 29, 2010
8:00 am—9:30 am

**Ascent Solutions and Cisco Present:
Lunch and Learn—July 2010**
Featuring Cisco Unified Computing

[Click Here to Register Now](#)

Managing IT Workloads today is an expensive, complicated and inflexible proposition. Market-leaders like Cisco are placing increasing focus on providing customers with the ability to consolidate servers and easily deploy development and test environments.

The benefit of Unified Computing technology is clearly evident. Unified Computing allows businesses to improve their IT efficiency while continuing to drive down costs.

In this informative session, we will discuss how you can regain control of your data center with solutions from Cisco Unified Computing. We will also discuss how you can protect and recover your workloads in a virtual environment. Finally, we will discuss additional ways to protect your environments with our award-winning solutions.

Please join us for this educational seminar hosted by Ascent Solutions and Cisco to discover new ways to migrate, protect and recover workloads in a virtual environment.

This seminar is free to our invited and registered guests.
